## **Current Limiting Circuit Breakers and Short Circuit Current Ratings**

Thursday, September 14, 2017 at 1:00 p.m. CT

Industrial control panels are now required to have a Short Circuit Current Rating (SCCR) appear on their nameplate. Manufacturers of industrial control components can assist panel designers calculate the SCCR of a panel by providing pre-tested combinations of their short circuit protective devices. Traditionally manufacturers have used standard Motor Circuit Protectors (MCPs) or Molded Case Circuit Breakers (MCCBs) in their testing.

Learn how using Current-limiting MCCBs can also be used in these combinations to supplement the SCCR of a pre-tested combination.
