

Cisco Meraki

Secure, cloud-managed IT for schools, municipalities, and agencies. Simplify operations, secure your digital and physical spaces, and purchase with confidence through Turtle.

CHALLENGE Doing more with less.

Public sector IT teams manage complex, distributed networks like schools, town halls, police stations, and remote facilities, often with limited staff and tight budgets. The result: inconsistent configurations, limited visibility, security gaps, and slow procurement cycles.

SOLUTION The Meraki Platform.

Cisco Meraki is the leader in cloud-controlled Wi-Fi, routing, and security. It eliminates the need for on-site controllers, allowing you to manage your entire agency or district from a single web-based dashboard.

At a glance

FOR IT DIRECTORS & NETWORK MANAGERS

Single pane of glass. Manage Wi-Fi, switching, security, and cameras across all sites from one dashboard.

Simplified compliance. View your entire organization's license status at a glance, without tracking individual device expirations.

Lean IT operations. Troubleshoot remotely and deploy new hardware quickly.

FOR PROCUREMENT & PURCHASING OFFICERS

Unified renewal cycle. All devices co-terminate to a single expiration date, with one renewal contract per year for the entire agency.

Audit-proof compliance. Licensing is averaged across the organization, eliminating the risk of devices accidentally expiring and falling out of compliance.

FOR CIOS & AGENCY DIRECTORS

Compliance-ready. Built-in tools to support CIPA, HIPAA, and PCI compliance.

Scalability. Seamlessly scale from one site to thousands without architectural changes.

Meraki product ecosystem

MR

Wireless

High-density Wi-Fi 6/6E for classrooms, lecture halls, and public spaces.

MS

Switching

Resilient Layer 2/3 connectivity with port-level visibility on every link.

MX

Security & SD-WAN

Robust firewall, content filtering, and secure site-to-site connectivity.

MV

Smart Cameras

Enterprise-grade video security with onboard analytics. No NVRs or servers required.

MT

IoT Sensors

Monitor temperature, humidity, leaks, and intrusion (server rooms, vape detection).

SM

Device Management

Control thousands of district-owned iPads, Chromebooks, and laptops.

Buy Cisco Meraki online through Turtle.

We combine the speed of e-commerce with the reliability of a tier-one distributor. Start a quote in minutes; co-termination logic is built in.
